Project WET

Project WET is an environmental education program designed for teachers and other educators working with children from kindergarten through grade 12. Project WET is sponsored by The Missouri Department of Natural Resources and offers interdisciplinary instructional activities, along with workshops and in-service programs for teachers, natural resource professionals, park and nature center staff and youth group leaders. Project WET activities are correlated with the Missouri *Show-Me Standards* and focus on teaching students "how to think" not "what to think."

Project WET workshops can be scheduled at your school site. Please contact the state coordinator Joe Pitts at the Missouri Department of Natural Resources to discuss the options available for on-site workshops
